

Bacterius®

MUCK

BACTERIAL MIXTURE FOR ORGANIC SLUDGE

Bacterius® MUCK is an effective blend of beneficial bacteria formed into pellets that sink into pond or lake muck.

Slow release sludge-eating bacteria consume nutrient rich muck, reducing bad odours associated with sulphide production.

Bacterius® MUCK is recommended to help clean accumulated muck from swimming areas, around docks and any shoreline where muck is a problem.

Completely safe for aquatic plants, animals and humans. Produced without harmful chemicals or dyes.

BENEFITS

Easy to apply, simply toss where required

Clears lake or pond bottom

Improves water clarity

Naturally, eliminates odour-causing muck on beaches

Reduces accumulated black organic sludge naturally without heavy equipment

Controls problematic nutrients that promote algae growth

Enhances the aquatic environment

Maximize effectiveness of the product with a bottom aeration system

Natural Beneficial Bacteria to Digest Organic Sludge

FEATURES

Naturally selected bacteria strains

Highly adaptable

Highly stable

Free of chemical preservatives

Free of pathogenic contaminants

Active in fresh and salt water

CONDITIONS OF USE

+10 °C, pH 5-9. Active in fresh and salt water.

NOTES

Direct contact may cause skin irritation, gloves recommended. Avoid contact with eyes. Do not ingest. Keep out of reach of children.

FORMATS

4,5 kg Box
(10 lbs)

11,3 kg Box
(25 lbs)

Master poly bag filled with bulk of 0,8g pellets packed in a single pail.

DOSAGE

Dosage may vary depending on the application, environmental conditions and volume of sludge to eliminate : 1 kg / 900 m³

FOR LARGE SCALE USE, PLEASE CONSULT US.

APPLICATION

Simply toss where needed.

ENTREPOSAGE

Store in a dry area.

Avoid exposure to frost and moisture.
