

Bacterius®

N

BACTERIAL MIXTURE FOR THE NITROGEN CYCLE

Ammonia tends to build up quickly in closed and partially open aquatic environments, due to the intense biological activity, the breakdown of plant debris and the accumulation of fish waste and uneaten food.

Ammonia is highly toxic to the aquatic environment, making it imperative to prevent its accumulation.

The nitrifying bacteria in **Bacterius® N** can quickly oxidize ammonia and nitrites into a non-toxic nitrogen compound.

Adding **Bacterius® N** to the aquatic environment is beneficial and provides an effective solution to regulate nitrogen compounds.

BENEFITS

Features a high-biomass, high-performance nitrifying bacteria consortium

Designed specifically to eliminate ammonia and nitrites in aquatic ecosystems

Actively oxidizes ammonia and nitrites, neutralizing their toxic effect on the aquatic life

Helps maintain a balanced aquatic ecosystem

Contributes positively to the health of aquatic animal and plant life

Reduces the risk of sickness and death among fish and plants

Natural Beneficial Bacteria, for Water Nitrification

FEATURES

More than 500 mg of active nitrifying bacteria per litre

Highly stable

Free of chemical preservatives

Free of pathogenic contaminants

Active in fresh and salt water

Complete genetic profile available

CONDITIONS OF USE

+10°C, pH 5-9. Active in fresh and salt water.

FORMATS

950 ml

4 litres

10 litres

20 litres

205 litres and 1 000 litres available on demand

DOSAGE

Treatment frequency and monthly dosage may vary depending on application and environmental conditions.

≤ 25 m³ of water volume: 25 ml / m³

between 25 to 100 m³ of water volume: 12,5 ml / m³

> 100 m³ of water volume: 5 ml / m³

CONTACT US FOR WATER VOLUME LARGER THAN 10000 m³

APPLICATION

Shake well before use

Add the treatment dose evenly over the surface to be treated or in the area of turbulence of the water supply or close to the diffusers.

STORAGE

Store in a dry area away from freezing

CERTIFICATION

DSL Listed Class 1 Bacteria strains
