

Aquatic Weed Tools

« Water Weedsickle » Motorized Aquatic Weed Cutter

The **Weedsickles** are Canadian built motorized weed cutters for lakes and ponds.

Only high-quality cast aluminium, stainless steel, and hardened spring steel components are used in the construction of these units.

Weedsickles are sturdy, yet lightweight.

Aquatic weeds are a nuisance on lakefront properties and private ponds. Cutting and removing these plants can be time-consuming and labour intensive with manual tools.

The **Weedsickle** will mow down these unwanted weeds with ease, saving time and energy.

For best results, plants should be cut early in Spring and maintained throughout the season. All cut weeds should be removed from the water so that they do not decompose into organic sediments.

Cutting and removing aquatic plants will stunt their growth, and will not allow them to proliferate resulting in the full enjoyment of your lakefront or pond.

Characteristics

- The Weedsickle mounts on the transom, bow, or side of the boat
- Adjusts 360 ° to cut forwards, backwards or sideways
- Tilt adjustment to cut on an angle, or for transit out of water
- Cutting knives are self-sharpening

- Powered by a 12-volt battery (not included)
- Two 12-volt batteries for the 24-volt models
- Typical cutting time for fully charged battery is 6-8 hours
- Weighs 50-60 lbs (22-27 kg)
- 2-Year Warranty

Markets

- Lakefront properties
- Private ponds
- Water sport basins
- Municipal lakes
- Marinas
- Canals

Models, Dimensions and Formats

HD12-4:

4 ft. cutter bar, 12-volt model, 60" shaft, requires 12-volt marine battery

HDL12-4:

4 ft. cutter bar, 12-volt model, 76" shaft, requires 12-volt marine battery

HD24-6:

6 ft. cutter bar, 24-volt model, 60" shaft, requires 2 x 12-volt marine batteries

HDL24-6:

6 ft. cutter bar, 24-volt model, 76" shaft, requires 2 X 12-volt marine batteries

LT12-2.5:

2.5 ft. cutter bar, 12-volt motor, 54" shaft, requires 12-volt marine battery

NOTE: The standard 60" shaft models will cut to 4 ft. of depth, and 76" extended shaft models will cut to 5 ft. of depth

Weedsickle Rake with transom mount for gathering cut weeds are available.
