

## CONCENTRATED LIQUID AQUATIC DYE

This environmentally friendly, non-toxic concentrated lake dye is formulated for use in ponds and lakes. Each super-concentrated litre treats approximately one surface acre pond of water.

The aquatic dye reduces sunlight penetration and gives the water a natural, darker appearance. By limiting UV light from entering the pond, the dye helps reduce one of the key factors that contribute to algae and weeds grow.

**Canadian Pond Liquid Dyes** are widely used by hotels, golf courses, commercial properties and private pond owners. When applied at the recommended rate, the product will not stain plants, swimmers, pets or wildlife.

**For optimal results, pair this product with beneficial pond bacteria to help maintain clean, clear water throughout the season.**

### BENEFITS

Filters sunlight and provides a natural, aesthetically pleasing, dark appearance to pond water

Blocks up to 40% of incoming sunlight, modifying the optical conditions in the water column and reducing light penetration

Helps keep water temperatures cooler

Supports management of excessive light exposure in garden ponds and small lakes

Easy to apply, lasts 4 to 6 weeks depending on water flow

Mixes quickly and evenly throughout the pond when the used with a fountain, aerator or similar mechanical device

### FEATURES

Available in black (ONYX), blue (AQUA) or black and blue blend (COBALT)

Super-concentrated formula containing more than 84% pure pigments

Completely free of pesticides and herbicides

Harmless, food based dye that will not stain swimmers, fish, plants or other wildlife when used as directed

Contains no biocidal substances and is not intended to control, destroy or eliminate aquatic organisms, any variation in aquatic vegetation is an indirect result of changes in environmental light conditions

### FORMATS

946 ml

12 bottles / case

### DOSAGE

1 bottle treats up to 6-acre feet (7,500 m<sup>3</sup>, 2,000,000 gallons) or 1 surface acre of water.

### APPLICATION

For best results, apply the product at several points around the perimeter of the pond or use in combination with aeration. Reapply monthly or as needed, as pigments will naturally oxidize and gradually fade over time.

### MANIPULATION

Wear protective gloves and eye protection. Handle with care. The product may stain when not diluted. Keep out of reach of children away from food and drinking water. Avoid exposure to acids, alkalis and strong oxidizing agents, as these substances may react with the product.

### STORAGE

Protect from freezing and excessive heat. Store in original container, out of direct sunlight in a dry, cool, well-ventilated area. Keep container tightly closed when not in use.

### PRECAUTION

Refer to the Safety Data Sheet (SDS).
